Making Energy Make Sense

We're not just another energy consultancy; we haven't reinvented the wheel; we just steer it differently. At Omnium, we combine new thinking with a business-first approach to make energy work better for your people, your profit, and our planet.

Let's change how energy is managed, together.

Our Mission

To deliver smarter, fairer, and more sustainable energy management; helping businesses thrive whilst doing right by people and the planet.

We exist to challenge outdated practices in the energy industry and build a better, cleaner, more honest way forward. Every day, we're working to transform how organisations think about energy; not as a necessary cost, but as a strategic opportunity for positive impact.

Our mission drives us to go beyond traditional consultancy. We're building lasting partnerships that create real change, measurable improvements, and genuine value for all stakeholders.

What We Believe

We believe in doing energy differently; our values came first; they're the foundation of our business!

Foundation

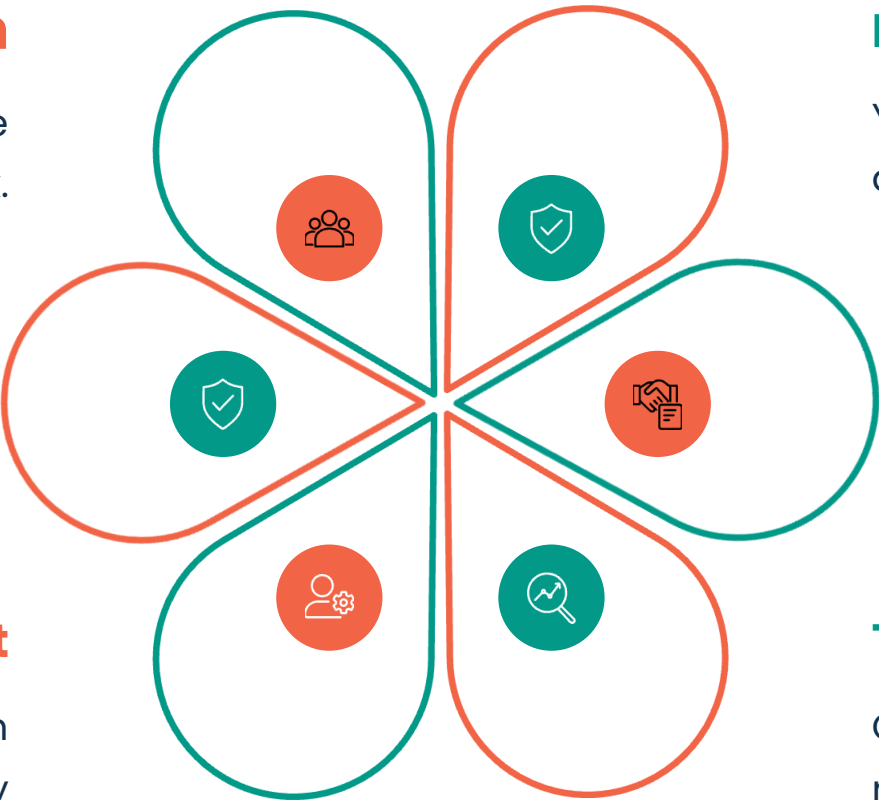

Our core values are interconnected, forming the foundation of our work.

Growth with Purpose

Designed for sustainable expansion that benefits business and environment

Full-Service Support

Complete solutions with no shortcuts; we're with you every step of the way

Business First, Always

Your business and team's wellbeing and comfort drive every recommendation we make

No Greenwashing

Just measurable impact backed by transparent data and honest reporting

Transparent & Accountable

Clear communication, ethical practices, and full responsibility for results

How We Work

Our proven three-stage methodology ensures comprehensive results and lasting impact. Every engagement follows our systematic approach to uncover opportunities, implement solutions, and drive continuous improvement.

Mapping

We uncover every inefficiency through a detailed energy health check and comprehensive energy assessments. Our expert team analyses your current usage patterns, identifies waste, and benchmarks performance against industry standards.

Managing

We design business-led strategies that balance cost savings with sustainability goals. Our bespoke solutions consider your unique operational needs whilst maximising both financial and environmental returns.

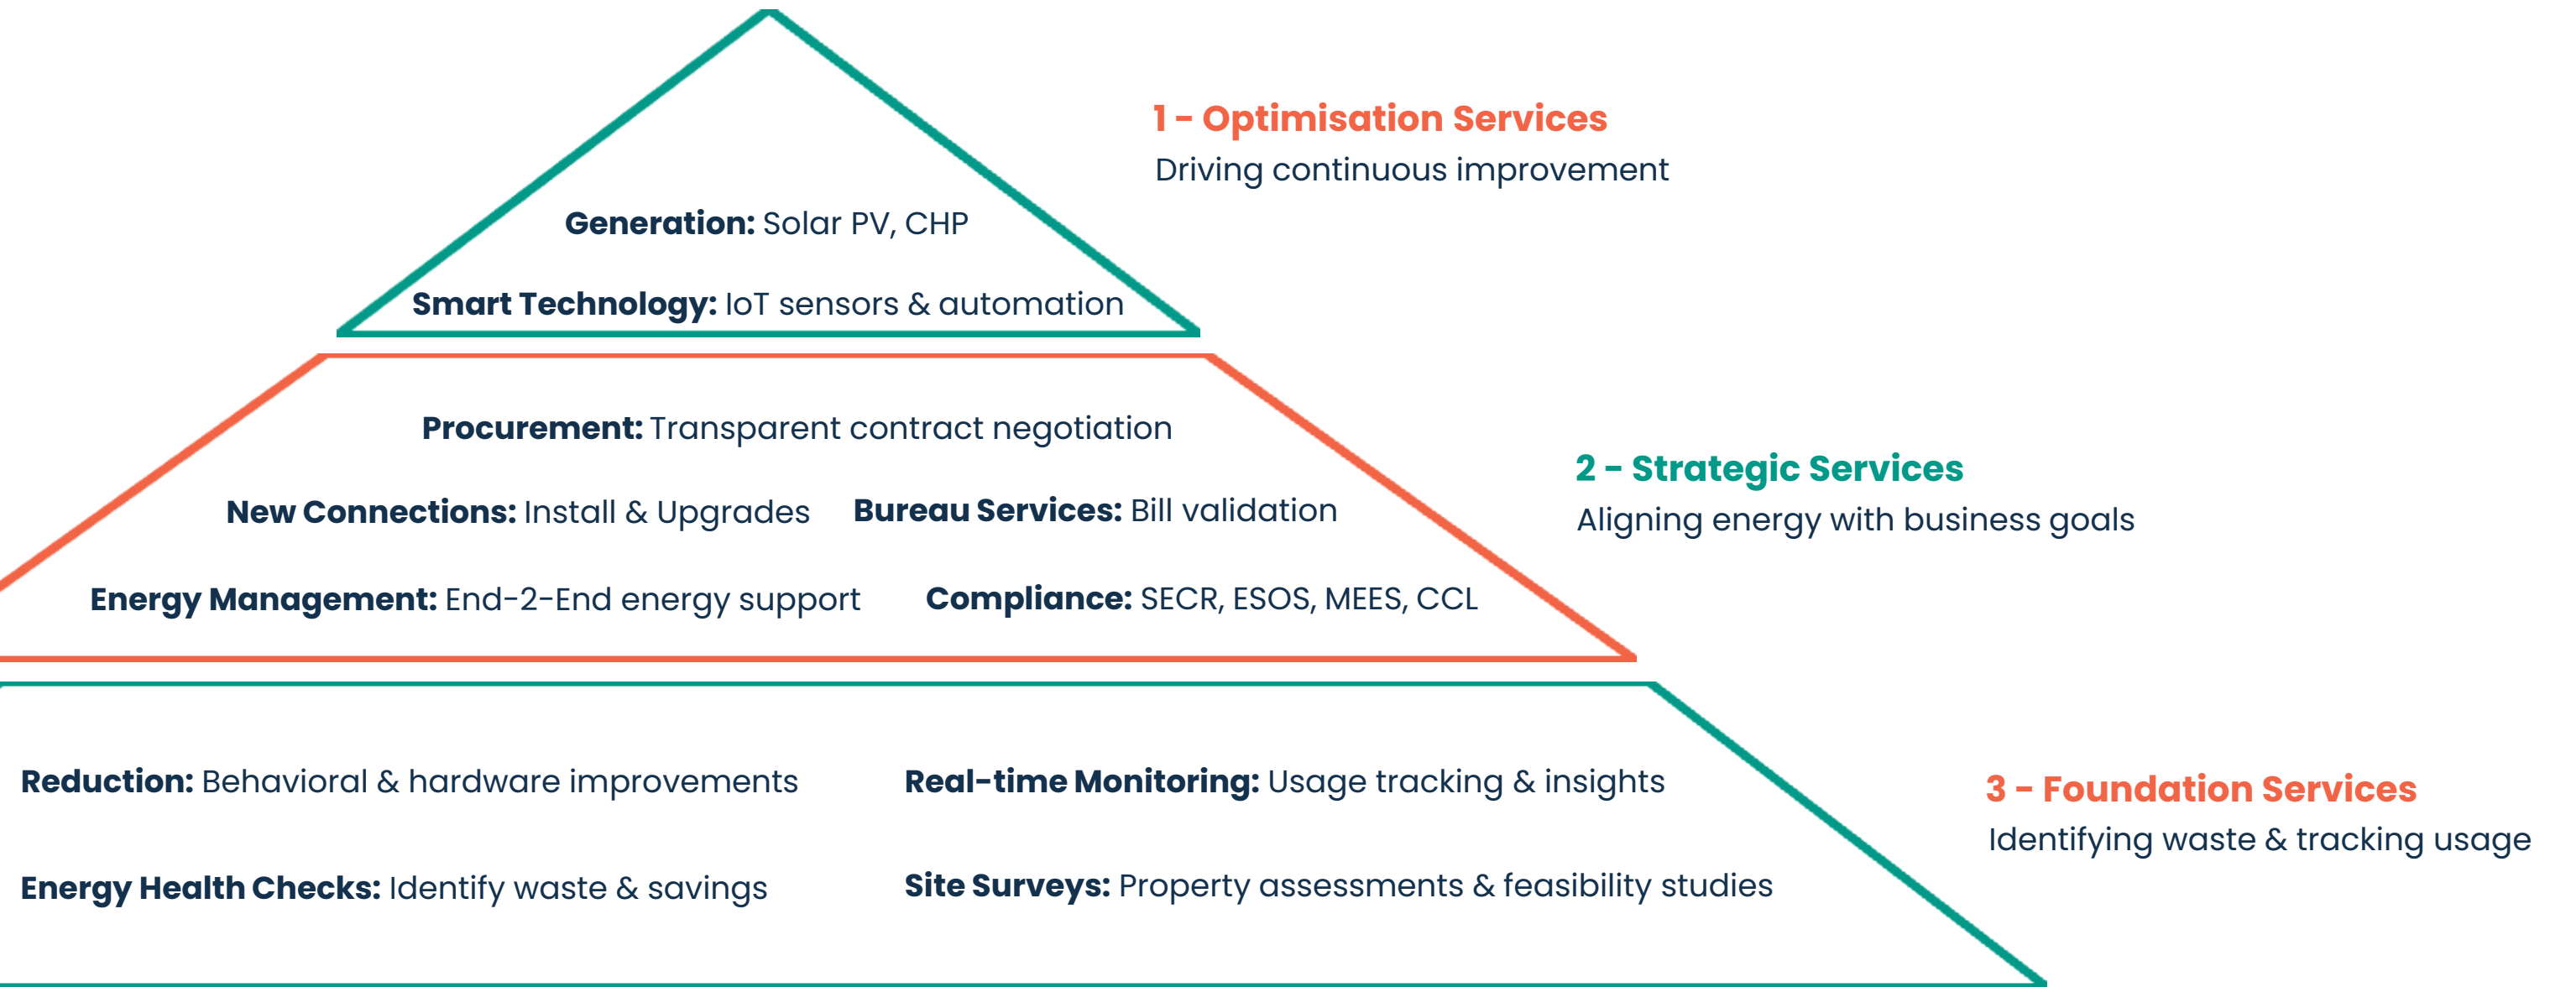

Maximising

We help you scale smarter with the right technologies and ongoing support. Continuous monitoring, optimisation, and strategic guidance ensure sustained performance improvements.

Every step is tailored to your specific requirements, delivered with complete transparency, and backed by full accountability for results achieved.

Our Core Services

We support businesses with a complete end-to-end offering designed to address every aspect of your energy requirements. Our comprehensive approach ensures no opportunity for improvement is overlooked.

Energy Contract Types

Choosing the right contract is critical to managing **cost, risk, and sustainability**.
Omnium provides clear, independent advice to help you select what's best for your business.

Fully Fixed

Costs locked for budget certainty.

Best for: Organisations needing stable budgets and protection from market volatility.

Flexible

Buy energy in tranches, benefit from market dips.

Best for: Larger users with appetite for risk and active management.

Hybrid

Tailored blend of fixed and flexible elements.

Best for: Businesses seeking balance between certainty and opportunity.

REGO-Backed Contracts

Certify green supply with Renewable Energy Guarantees of Origin.

Best for: Businesses committed to sustainability and reducing carbon footprint.

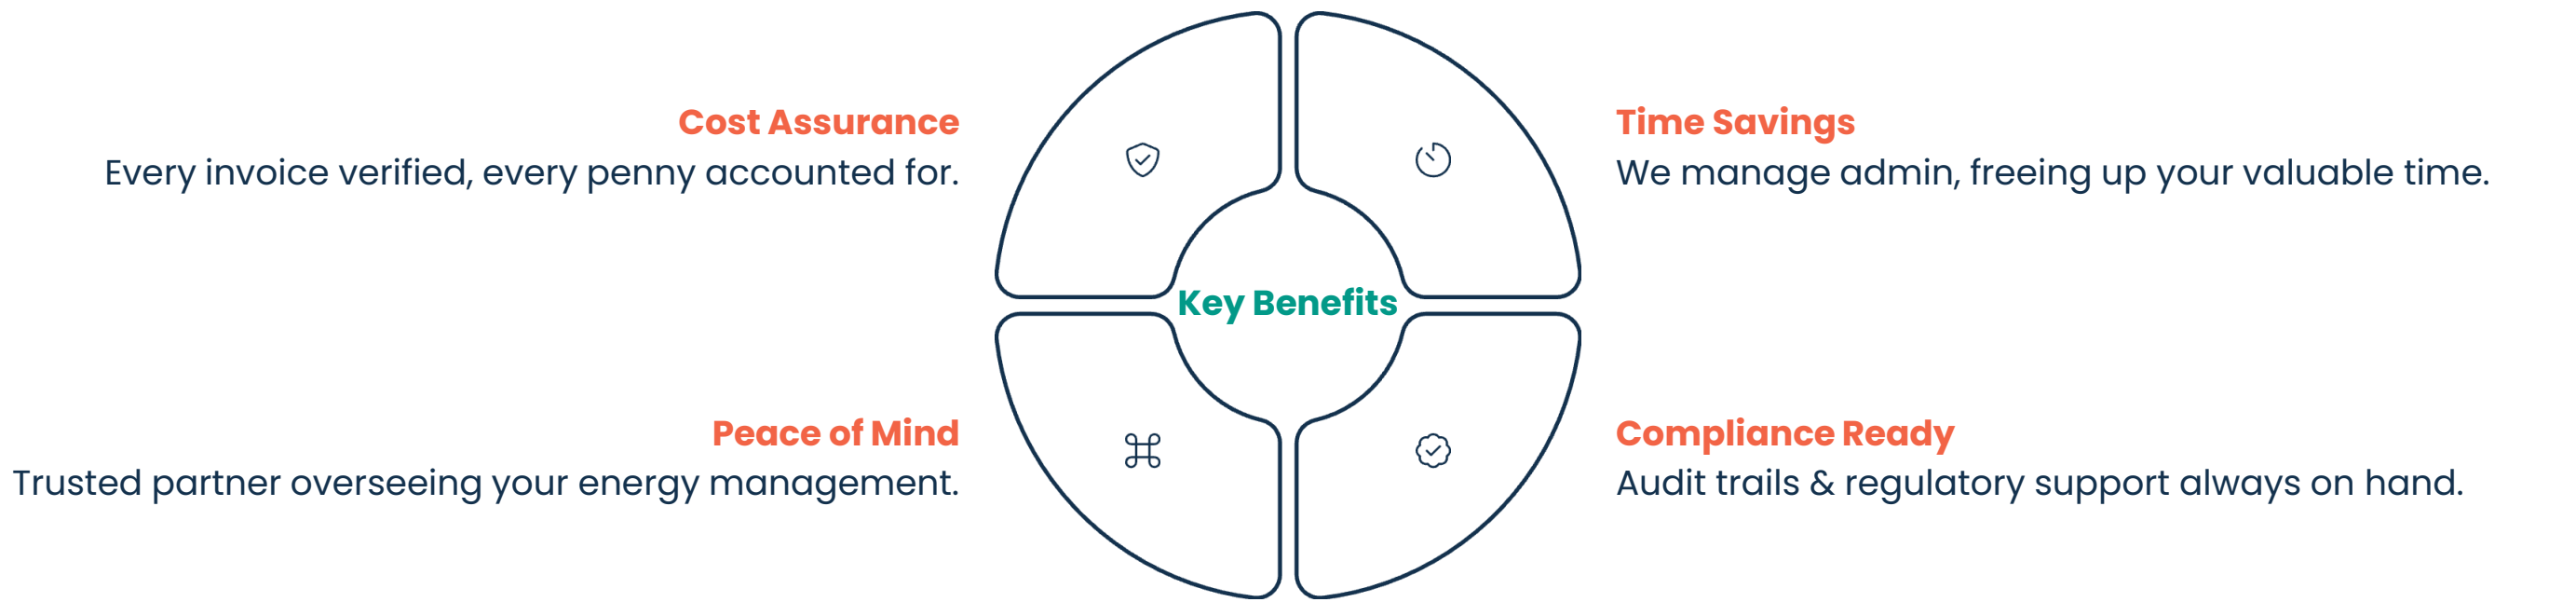

Why It Matters

- Transparency of charges
- Matches your risk appetite
- Supports your sustainability goals

Bureau Services

Complete Back-Office Support for Energy Management

We handle the detail, so you can focus on running your business.

Our Comprehensive Services

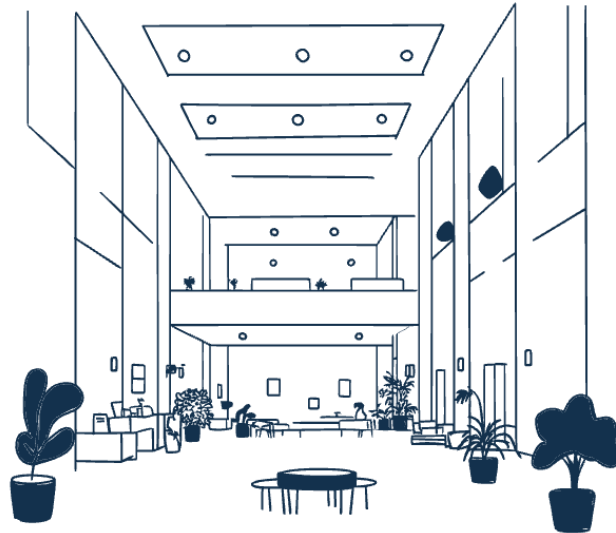

Financial Management Ensuring accurate billing, recovering overcharges, and providing precise budgeting and forecasting for your energy spend.	Data & Reporting Detailed analysis of your energy usage, identifying anomalies, and delivering custom reports on consumption, emissions, and compliance.	Operational Support Streamlining tenant billing, managing sub-meters, and handling all communication and query resolution with energy suppliers.

Who We Serve

Our ideal clients are forward-thinking leaders who understand that energy management is both a strategic opportunity and a responsibility. They value transparency, seek measurable outcomes, and want to make a positive impact whilst improving their bottom line.

We work with businesses of all sizes; **Small, Medium, Large** and **charitable organisations** who want more from their energy partner. We support organisations ready to move beyond traditional approaches and embrace innovative solutions that deliver real results.

We have not reinvented the wheel; we just steer it differently!

Hotels & Hospitality

From boutique properties to large chains, we help hospitality groups reduce costs whilst enhancing guest comfort and satisfaction.

Office Spaces

Co-working spaces and corporate offices looking to optimise productivity whilst reducing environmental impact.

Restaurants & Venues

Restaurants, stadia, and entertainment venues benefit from our specialised approach to high-usage environments.

Industrial, Commercial & Public Sector

Supporting mid-market, industrial, commercial, and public sectors to achieve cost savings and sustainable operations.

Why Choose Omnium?

The Omnium Difference: New Possibilities

We stand apart from traditional energy consultancies. Here's why leading organizations trust us.

Generic Solutions

→

Targeted Expertise

We offer targeted, industry-specific strategies, not one-size-fits-all solutions.

Opaque Pricing

→

Total Transparency

Our pricing is transparent, ethical, and free of hidden margins.

Transactional Focus

→

Strategic Partnership

We prioritise sustained impact and long-term partnerships over quick wins.

Unquantified Savings

→

Proven, Measurable Results

We quantify and deliver real, measurable savings.

Status Quo

→

Disruptive Innovation

We drive disruptive innovation, setting new standards for energy management.

Beyond Consultancy

We're more than a service provider. We're your energy partner, committed to building lasting relationships that drive continuous improvement and sustainable success.

Our approach goes far beyond traditional consultancy models. We become an extension of your team, providing ongoing support, training, and strategic guidance that evolves with your business needs.

Real Relationships

Genuine partnerships built on trust, not transactional interactions

Tailored Support

Bespoke onboarding and implementation designed for your specific requirements

Dedicated Management

Personal account managers who understand your business and anticipate your needs

Team Training

Workshops and education programmes to empower your staff with energy knowledge

Always-On Optimisation

Continuous monitoring and improvement to ensure sustained performance gains

We're here from day one; and every day after. Your success is our success, and we're committed to supporting your energy journey for the long term.

Our Track Record

We've helped power transformation for some of the UK's most forward-thinking brands. Our client relationships speak to our ability to deliver consistent results across diverse sectors and operational challenges.

19.4%

Average Savings

Energy cost reduction achieved across client portfolio

200+

Active Clients

Businesses trusting us with their energy management

£20M+

Annual Savings

Total cost reductions delivered to clients this year

Our clients include:

Our results speak for themselves; and so do our clients. Each partnership represents a commitment to excellence, innovation, and measurable impact that drives both business success and environmental progress.

Join the Movement

Energy isn't just a line item

It's a lever for positive change. Let's use it wisely.

Partner with Omnium and be part of a smarter, more ethical energy future where you have control.
Together, we can prove that doing good business and doing good for the planet aren't mutually exclusive; they're inseparable.

The energy transition is happening whether we lead it or follow it. Choose to lead. Choose to make a difference. Choose to work with a partner who share your values and commitment to positive impact.

Ready to transform your energy strategy?

Thank you for considering Omnium as your energy partner. We're excited about the possibility of working together to create positive change in your organisation and our industry.

The future of energy is bright, sustainable, and people-focused.
Let's build it together.
